DIAGNOSTIC IMAGING REPORT

PATIENT	NOVAK, Emily	**DOB / AGE / SEX**	04/02/1985 / 41 / Female
MRN	SUW-0417762	**ACCESSION**	SUW-26-1006-0391
ORDERING PROVIDER	Laura Kim, MD, Bluebonnet Family Medicine	**EXAM DATE**	10/06/2026 09:30 AM
INSURANCE	Cedar Mutual, Cedar Mutual HSA 3500	**MEMBER ID**	CMU-8841-2236
REPORT STATUS	Final	**REPORTED**	10/06/2026 02:48 PM

EXAM:

US ABDOMEN, COMPLETE

CLINICAL INDICATION:

Intermittent right upper quadrant pain after meals for 3 months. Evaluate for gallstones.

TECHNIQUE:

Real-time grayscale and color Doppler sonography of the abdomen.

COMPARISON:

None.

FINDINGS:

Liver: Normal in size (15.2 cm) and echotexture. No focal lesion. Hepatopetal portal venous flow.

Gallbladder: Multiple mobile, shadowing gallstones, the largest measuring 1.4 cm. Wall thickness 2 mm. No pericholecystic fluid. Sonographic Murphy sign is negative.

Bile ducts: Common bile duct measures 4 mm. No intrahepatic biliary dilatation.

Pancreas: Visualized head and body are unremarkable. The tail is obscured by bowel gas.

Spleen: Normal in size (10.1 cm).

Right kidney: 10.8 cm. Normal echotexture. No hydronephrosis, stone, or mass.

Left kidney: 11.4 cm. 2.8 x 2.5 x 2.6 cm solid, mildly hypoechoic exophytic mass in the upper pole with internal vascularity on color Doppler. No hydronephrosis.

Aorta and IVC: Normal in caliber where visualized.

Other: No ascites.

IMPRESSION:

1. Cholelithiasis without sonographic evidence of acute cholecystitis.
2. 2.8 cm solid, vascular exophytic mass in the upper pole of the left kidney, concerning for a renal neoplasm. Recommend contrast-enhanced renal mass protocol MRI or CT.
