DIAGNOSTIC IMAGING REPORT

PATIENT	RAMIREZ, Sofia	DOB / AGE / SEX	01/25/1997 / 29 / Female
MRN	SB-8840215	ACCESSION	SBR-26-1018-3318
ORDERING PROVIDER	Alicia Moreno, MD, St. Brazos Emergency Department	EXAM DATE	10/18/2026 04:40 PM
INSURANCE	Lone Star Health, Lone Star HMO 2000	MEMBER ID	LSH-4419-7350
REPORT STATUS	Final	REPORTED	10/18/2026 05:12 PM

EXAM:

CT ABDOMEN AND PELVIS WITH INTRAVENOUS CONTRAST

CLINICAL INDICATION:

Motor vehicle collision, restrained driver, airbag deployment. Lower abdominal pain and seatbelt mark. Evaluate for traumatic injury.

TECHNIQUE:

Helical CT of the abdomen and pelvis in the portal venous phase after intravenous administration of 100 mL iohexol 350. Coronal and sagittal reformats were reviewed. CTDIvol: 11.2 mGy. DLP: 548 mGy-cm.

COMPARISON:

None.

FINDINGS:

Lower chest: Lung bases are clear. No pneumothorax.

Solid organs: No laceration or hematoma of the liver, spleen, pancreas, kidneys, or adrenal glands.

Bowel and mesentery: No bowel wall thickening, mesenteric hematoma, or free air.

Peritoneum: No free fluid.

Pelvic organs: The uterus is normal. 3.4 cm cystic lesion of the right ovary with a single thin internal septation; no solid component or mural nodularity. The left ovary is normal with physiologic follicles. The bladder is unremarkable.

Vessels: No vascular injury.

Bones: No fracture.

Soft tissues: Mild subcutaneous stranding of the lower anterior abdominal wall, consistent with seatbelt contusion.

IMPRESSION:

1. No acute traumatic injury in the abdomen or pelvis.
2. Lower anterior abdominal wall contusion.
3. 3.4 cm right adnexal cyst with a thin internal septation. Recommend nonemergent pelvic ultrasound for further characterization.
