DIAGNOSTIC IMAGING REPORT

PATIENT	SIMMONS, Walter	**DOB / AGE / SEX**	01/30/1959 / 67 / Male
MRN	LDI-0093318	**ACCESSION**	LDI-26-1002-1185
ORDERING PROVIDER	Brian Castillo, MD, Lakeline Orthopedics	**EXAM DATE**	10/02/2026 10:40 AM
INSURANCE	Pecan Health Plans, Pecan Senior Advantage (HMO)	**MEMBER ID**	PSA-7731-5520
REPORT STATUS	Final	**REPORTED**	10/02/2026 01:15 PM

EXAM:

XR CHEST, 2 VIEWS (PA AND LATERAL)

CLINICAL INDICATION:

Preoperative evaluation before elective right total knee arthroplasty.

TECHNIQUE:

PA and lateral views of the chest.

COMPARISON:

None available.

FINDINGS:

Lungs: The lungs are hyperinflated with flattening of the hemidiaphragms. There is a 1.6 cm rounded nodular opacity projecting over the left upper lung zone, best seen on the frontal view. No consolidation, pleural effusion, or pneumothorax.

Heart and mediastinum: Heart size is within normal limits. Calcification of the aortic knob. Mediastinal contours are otherwise normal.

Bones: Degenerative changes of the thoracic spine. No acute osseous abnormality.

IMPRESSION:

1. 1.6 cm nodular opacity in the left upper lung zone. Recommend CT chest for further characterization.
2. Hyperinflation, which can be seen with COPD.
3. No acute cardiopulmonary process.
